Fine Spray

Compact & Convenient

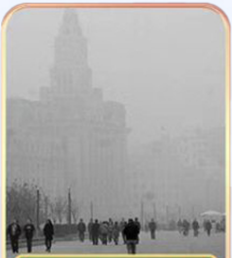
Fast Absorption

Are you still suffering from the following problems?

Affected due to climate and environment
95% of people have problems with their lungs, throat, trachea, liver and stomach

Itching or discomfort

Socializing and drinking too much



Weather haze

Excessive use of voice

Smoking for many years

Seasonal allergies

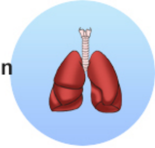
About physical health

Long-term accumulation will cause more serious damage to health

① Staying up late for a long time - Liver

Known as the central processing plant of the human body for substance metabolism, the liver has functions such as metabolism, immunity, bile production and excretion.

② Smoking and drinking - Lungs



The important respiratory organ of the human body, its main functions on the human body include ventilation, ventilation, defense and regulating acid-base balance, etc.

③ Overeating and polydipsia - Stomach

The main organ of the human body, the stomach is responsible for food storage, digestion and absorption, immunity, etc.

HXJH. Main components of atomization

Huajuhong (Tomentose Pummelo Peel) effect

There is ginseng in the north and Huajuhong in the south.
Huazhou Huajuhong has been famous for thousands
of years - the first of the four major southern medicines

Flavonoids

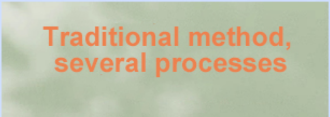
Antioxidant, eliminate free radicals

Core production area: Huazhou

China's intangible heritage

Narirutin

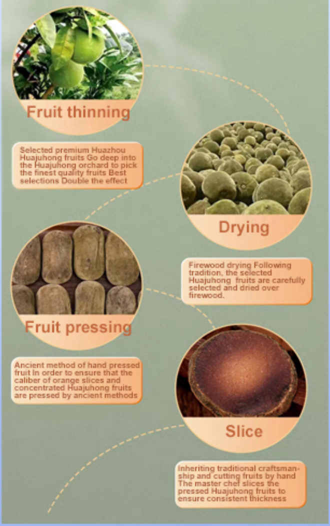
Narirutin is a dihydroflavonoid compound, so it has a strong UV absorp-



tion peak at 282NM, making naringin display a variety of biological activities and pharmacological effects. It has anti-inflammatory, anti-viral, anti-cancer, anti-mutation, and anti-tumor properties. Ulcer, anti-allergic, analgesic, blood pressure lowering activity, can lower cholesterol, reduce thrombosis, improve local microcirculation and nutrient supply, and can be used to prevent cardiovascular and cerebrovascular diseases.

Anacardiin

It has anti-tumor and anti-hypertensive properties, and is an oxidation inhibitor and antioxidant.



Fruit thinning

Selected premium Huazhou Huajuhong fruits Go deep into the Huajuhong orchard to pick the finest quality fruits Best selections Double the effect

Drying

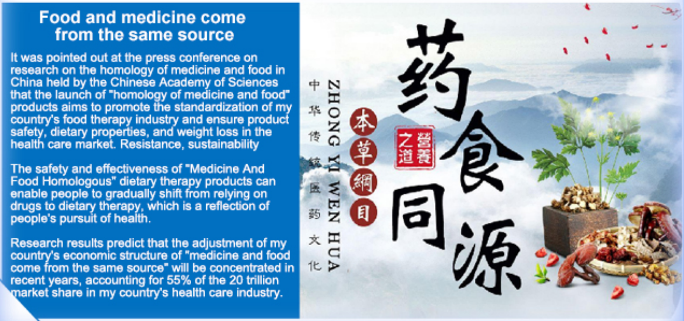
Firewood drying Following tradition, the selected Huajuhong fruits are carefully selected and dried over firewood.

Fruit pressing

Ancient method of hand pressed fruit In order to ensure that the caliber of orange slices and concentrated Huajuhong fruits are pressed by ancient methods

Slice

Inheriting traditional craftsmanship and cutting fruits by hand The master chef slices the pressed Huajuhong fruits to ensure consistent thickness



Food and medicine come from the same source

It was pointed out at the press conference on research on the homology of medicine and food in China held by the Chinese Academy of Sciences that the launch of "homology of medicine and food" products aims to promote the standardization of my country's food therapy industry and ensure product safety, dietary properties, and weight loss in the health care market. Resistance, sustainability

The safety and effectiveness of "Medicine And Food Homologous" dietary therapy products can enable people to gradually shift from relying on drugs to dietary therapy, which is a reflection of people's pursuit of health.

Research results predict that the adjustment of my country's economic structure of "medicine and food come from the same source" will be concentrated in recent years, accounting for 55% of the 20 trillion market share in my country's health care industry.

Herbal ceramic atomizer core

The fourth generation ceramic atomization core is specially designed for herbal atomization

Honeycomb ceramic atomizing core

Twenty thousand honeycomb micropores atomize at the same time, bringing fine and soft smoke

Constant power output

Ensure the atomization power is strong, the essential oil is fully atomized, and there is no oil leakage or moisture in the core.

Fog quickly

Delicate cotton soft

Liquid leak proof

High atomization rate

Really achieved: no oil leakage, no burnt core, delicate taste, stable smoke

Nano-targeting, atomization, penetration, cell absorption

+

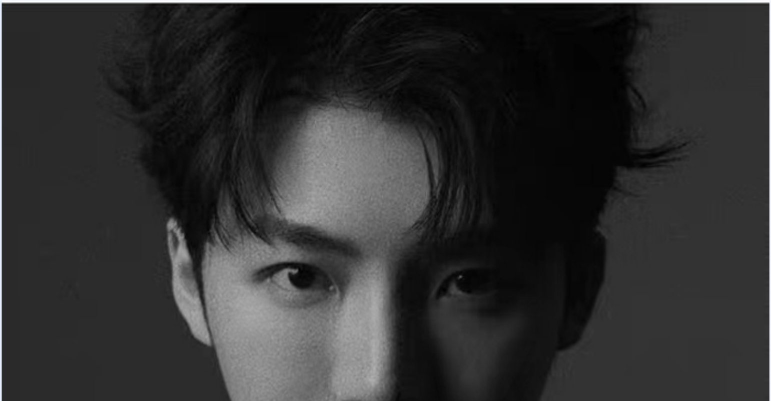
Nano herbal atomizer liquid

- ☑ Pulmonary drug delivery and better than oral administration
- ☑ Clean oral bacteria and impurities quickly
- ☑ The atomized liquid penetrates deeply into the capillaries
- ☑ Tangerine fruits ingredients directly act on nerve cells

華夏橘紅

Huaxia tangerine atomization

Love your country, love your family, and love yourself!
Care begins with your lungs!



Product qualification, professional testing

The quality is guaranteed so you can buy with confidence

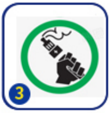
Instructions

Unpack
Remove the
silicone plug

Installation bomb
Breathe deeply
into your lungs
for 5 seconds



10-15 puffs
in a row
each time

Finish by sealing
the suction
port with a
silicone plug

Product information

Brand

HXJH Atomization Set

Specification

Atomizer rod (420mAh)*1/
Atomizer bomb *2

Case number

Guangdong Food and
Drug Administration Equipment
Production Certificate No. 20203724

Validity period

One Year

Scope of application

1. Resolve phlegm and relieve cough
2. Clear throat and moisturize lungs, clear throat and soothe throat, moisten lungs and relieve cough
3. Quick hangover cure

Precautions

1. It is prohibited for those who are allergic to this product and it is prohibited for pregnant and lactating women with allergies.
2. It is forbidden to use this product when its properties change.
3. Please keep it out of reach of children
4. This product is a medical device and cannot replace medicines.

Storage

Sealed, ventilated, clean, dry place, prohibited from contact with toxic and harmful substances

Product display

Three colors available

- 🟧 Orange
- 🟩 Gradient green
- 🟦 Dark blue
