

Common disadvantages of other brands

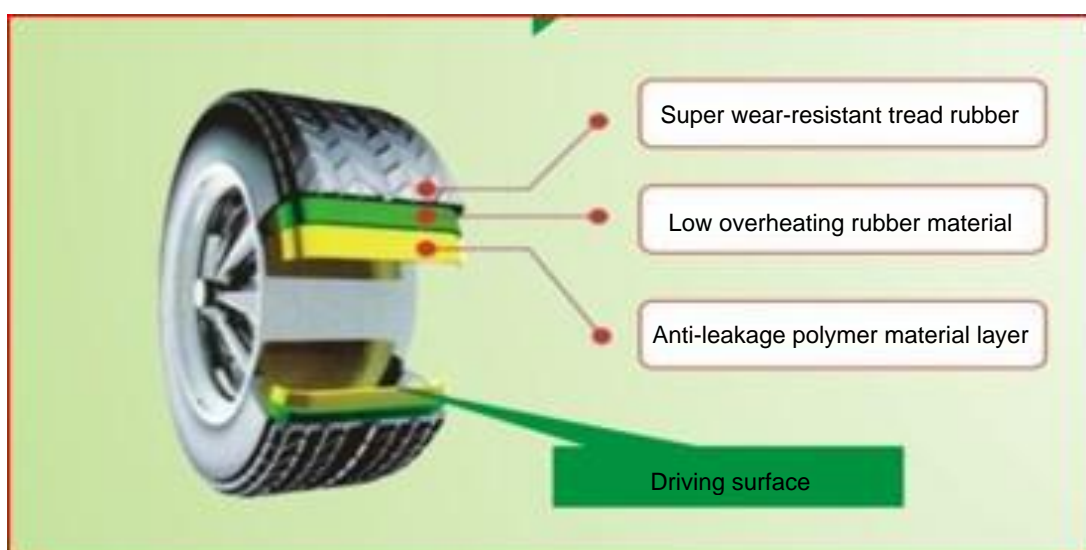

- * Comfortable, low wear resistance, low noise, traveling 25,000 kilometers, the tires have a short service life.
- * Climbing and gripping type, professional off-road pattern, poor comfort, loud noise, high fuel consumption.
- *Wear-resistant, can travel up to 40,000-50,000 kilometers, poor comfort, loud noise, high fuel consumption.
- *Comprehensive, wear-resistant, good grip, poor comfort and loud noise.

Compendium

Disadvantages of tires: good comfort and poor wear resistance, high fuel consumption, high noise and poor comfort.

YHL tires are a combination of Michelin's comfort and Dunlop's wear resistance.

YHL safety tires: polymer (nano) memory rubber is used as a leak-proof layer, which has a good noise reduction function, can reduce the vibration and noise of the vehicle, improve driving comfort, and save fuel by 2-3 points per 100 kilometers.
